PROFILE:

An organized and ambitious student, I am particularly proficient in HTML, CSS, Java, and SQL, as well as Adobe Photoshop, Illustrator, and InDesign. I am also a reliable team player, always ready to show my ingenuity.

EDUCATION:

2020-Present Beirut, Lebanon	Bachelor of Engineering in Computer and Communication Engineering Majoring in Multimedia Antonine University Expected graduation 2025

ACADEMIC PROGRESS:

2020-2021 Programming	**E-commerce shopping counsel**: using C++, I made a code for shopping items (item list read from a Txt file).
2020-2021 Web design	Tv series website: using HTML and CSS I made a website for tv series (list of series).
2021-2022 Web Programming	**E-commerce shopping site**: Design and development of shopping. site system. Among the features are: the login and registration system for users and administrators, the creation of a shopping cart, and the management of orders and sales by the admin. Made with Java and MySQL.
2022-2023 Infographics	**Magazine layout**: including cover page and everything a magazine should have (dynamic page numbers, design, ...) using Adobe InDesign **Company logo**: I choose a company and made a new logo for it. **Company stationery**: Letterhead, envelope, business card.
2022-2023 Object-oriented Programming 1	**Pc-parts Shopping counsel**: using Java, I and my teammate made a code that access data from MongoDB and JSON file and allow the user to: see items list, add/delete item, buy/edit item and save the changes made to JSON file and MongoDB database.
2022-2023 Object-oriented Programming 2	**SIS GUI:** using JavaFx and mongodb, I and my teammate made a code that access data from MongoDB and made a user interface where we have 3 users admin, teacher and student, each user has specific functions.
